

Inaugural University of Cincinnati STEM Education Symposium

Hosted by the College of Engineering and Applied Science's
Advancing Student Success in Engineering and Technology
(ASSET) Group

Friday, May 8th, 2015
Tangeman University Center
8am – 12noon

Purpose: This event brings together STEM educators from around the greater Cincinnati area to talk about common issues and share best practices in STEM education. The event will begin with a keynote address and will be followed by two small-group discussion sessions. The discussion sessions will be focused on different issues related to STEM education, allowing participants to choose topics that are of most interest to them and the opportunity to interact with other educators with similar interests. Topics will include assessment, pedagogical innovations (such as the flipped classroom), distance learning, student engagement, and models for faculty development.

Schedule of Events:

8:00 -9:00 am	Keynote Address
9:00 – 9:15	Break
9:15 - 10:30	Discussion session 1
10:30 - 10:45	Break
10:45 -12:00	Discussion session 2

Keynote Address: Dr. David E. Goldberg “A Whole New STEM Classroom”

Bio: Dr. David Goldberg is an emeritus faculty at the University of Illinois at Urbana Champaign and is the founder and president of [ThreeJoy Associates, Inc.](#), a firm focused on helping those in higher education transform to meet the needs of the 21st century student. He is also the coauthor of “A Whole New Engineer: The Coming Revolution in Engineering Education.”
