

GCSC Announces Round 1 Summer of STEM 2017 Mini-Grants March 15, 2017

Summer of STEM transforms Greater Cincinnati into a classroom without walls and create opportunities for students to explore STEM (Science, Technology, Engineering, and Math) learning and careers specifically during the summer months. The initiative's main objectives are:

1. Dramatically increase the number of people, especially parents and families, aware of the outstanding opportunities available to students when they pursue STEM education and careers.
2. Make STEM summer programming accessible to significantly more K-12 students in our region, especially diverse and underserved children.

GCSC is pleased to announce that, due to the generosity of our supporters, the 21 partners have been selected to receive mini-grants to support their Summer of STEM 2017 programming. Selection criteria were: Inclusion and Access, [STEM Engagement Best Practices](#), Sustainability, Innovation, and Sponsor Priority.
