

4th ANNUAL 3d PRINTERS SHOWCASE

3d printers club

Your Invitation!

Community partners are invited to exhibit at the March 18, 2020 3d Printers Showcase. 2019 exhibitors included P&G, GE, Cincinnati Museum Center, Cincinnati State, Northern Kentucky Makerspace, The Public Library of Cincinnati and Hamilton County, University of Cincinnati, and more. Exhibitors show students the vast array of STE(A)M opportunities they can pursue.

What's The 3d Printers Club?

3d Printers Clubs students design and produce solutions to real problems using 3D printers in a 10-week program that includes volunteer coaches. Clubs engage students broadly across Greater Cincinnati to build their engineering / design / making skills, confidence, and interest in additional STEM learning and future STEM careers.

What Does an Exhibitor Do?

Exhibitors show students what comes next! They showcase follow-up STEM learning opportunities (K-12, college, and career). **They occupy a "booth" at the showcase from 9:30am-1:30pm and provide information that shows how their organization relates to STEM.** Exhibitor set-up begins at 9:00am. Note that students participate in an "Exhibitor Scavenger Hunt" and will have questions for you to learn more about your organization and STEM field(s). Your booth should be engaging and hands-on in order for maximum impact! Feel free to bring hand-outs and flyers.

Get Signed Up!

If you're ready to sign up, **use this [link](#) to register** (tell us specific requirements for table space, access to power, etc.) If you would like more information, **contact the Greater Cincinnati STEM Collaborative (GCSC) at gscstemed@gmail.com.**

Read more about [last year's showcase](#) at the University of Cincinnati!

When & Where

University of Cincinnati

Tangeman University Center
Great Hall

Thursday, March 18, 2020
9:30am-1:30pm

The Event

Join our partners
to inspire **500+ middle-school age students** in
Science, Technology,
Engineering, & Math at the
**Greater Cincinnati's 3d
Printers Showcase!**

Students from over 40 local
clubs will showcase their 3D
printed solutions they have
created this year!
